EDUCATION

University of California, Merced

Bachelor of Science in Computer Science and Engineering

Aug. 2022 - Expected Dec. 2026

RELEVANT COURSEWORK

Data Structures | Computer Organization | Networking | Assembly | Algorithms

TECHNICAL SKILLS

Languages: C++, Python, C#, JavaScript, SQL, HTML/CSS, MIPS Assembly, GDScript

AI and Data APIs: Gemini, OpenRouter, ElevenLabs, Open-Meteo, NASA APIs, Global Biodiversity Information Facility (GBIF)

Tools and Platforms: Figma, Git, VS Code, RARS, Docker

Game Engines and Environments: Godot, Unity, Node.js

Concepts: Object-Oriented Programming, Full-Stack Web Development, Debugging, Networking Protocols, System Architecture

PROJECTS

Lawrence Livermore National Laboratory (LLNL) Capstone Project:

- Collaborating with Dr. Rakestraw from LLNL for a senior computer science capstone project, to research the impact and use of AI in helping educate high school and undergraduate students about STEM topics.
- Developing STEM-related games that have integrated AI, LLMs, and APIs to help students understand STEM topics better.
- **EcoBuilder Simulation Game (GDScript/C++/JavaScript/GDShader):**
 - Engineered an interactive 3D ecosystem simulation in Godot, modeling predator-prey dynamics across 7 animals and 5 plant species, by integrating Open-Meteo and GBIF data APIs for a realistic global environment.
 - Architected a secure Node.js backend to manage API keys and calls for security and to limit request rates.
 - Developed a voice-responsive AI helper utilizing OpenRouter for the response and ElevenLabs for dynamic text-to-speech audio interactions.
 - Integrated custom C++ GDExtension using Miniaudio to process users' audio input for interactive communication with the AI bot.

EXPERIENCE

Networking Infrastructure Deployment | Le Architecture:

- Wired the office with CAT6 Ethernet cables and terminated each wire at individual workstations, linking them all to the central server.
- Configured each workstation to be operated either in the office or remotely via Dropbox.
- Installed and set up an Eero mesh Wi-Fi system to provide reliable internet coverage throughout the office.
